

Capability Statement

Leveraging our history and experience to deliver for the future

BUMA Australia has established a solid foundation in the Queensland mining industry as a highly experienced and reliable mining services provider.

With a focus on providing value to our clients through all stages of mining, our goals for the future are to strengthen our position, and expand geographically and across different commodities.

Values

BUMA Australia's vision is to build a modern mining and rehabilitation company, that drives growth, sustainability, and prosperity.

SAFETY

We are dedicated to working safely, it's a mindset, a way of thinking, and a commitment to the well-being of our people, our communities, and the environment.

INTEGRITY

Our company is founded on good people doing good things, "We do what we say we are going to do" isn't just a tagline for us, we deliver on our promises.

PROGRESS

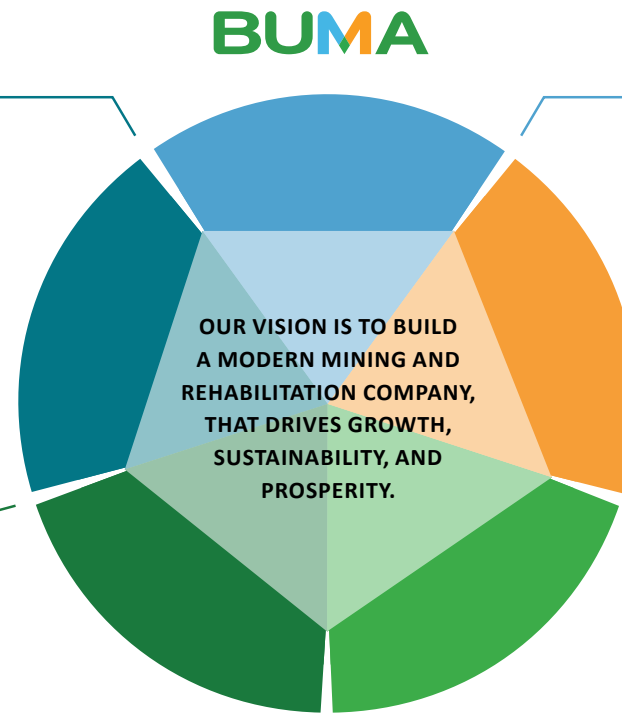

We pursue growth and see change as an essential part of our journey.

PEOPLE

Our greatest strength is our people, we recognise their history and value how they shape our future.

COLLABORATION

We actively seek collaboration with all stakeholders to find common solutions and positive outcomes.

Services

Building on our 75-year history of safe and efficient service delivery, we have the expertise and equipment to deliver total mining services to any surface operation by leveraging efficient processes, responding quickly and nimbly; and focussing on creating positive experiences for our employees and stakeholders.

With a strong commitment to safety, progress and technology, BUMA Australia pursues a relationship-based, long-term approach to ensure the mutual success of all projects to deliver successful outcomes for our clients' operations and organisations.

BUMA Australia offers a range of rehabilitation services, supporting clients through all stages of mining operations – positioning us as the comprehensive solution for all your mining services needs.

At BUMA, our approach is marked by several key principles. We focus on the progressive reduction of liabilities and making concerted efforts to minimise closure-related obligations whenever feasible.

These services are underpinned by an absolute responsibility for the health and safety of our employees and others, along with a commitment to environmental management and future sustainability.

Leveraging our history and experience to deliver for the future
